SUMMARY

Software Developer with 2 years of experience in shipping full-stack web and mobile projects using React and React Native for businesses. Founder of Zoro, a hyperlocal quick-commerce delivery platform and Ashu Websites, helping local businesses go digital. Seeking an internship opportunity to gain practical exposure and develop professional skills.

EXPERIENCE

Founder & Developer — Zoro Delivery App 2026 – Present

- Building a hyperlocal quick-commerce platform from scratch — 3 separate apps (customer/business, rider, admin) targeting same hour delivery from nearest local shops.
- Integrated MapmyIndia Maps API for hyperlocal store discovery, real-time rider tracking, and delivery routing and architecting a RazorpayX split system distributing revenue automatically across stores and riders.
- Onboarded **7+** local shops with **160+** products in gurugram sector 51, listed across categories, verified store profiles, and live inventory on the platform.

Founder & Developer — Ashu Websites 2025 – Present

- Founded a freelance web development venture helping local businesses establish a digital presence with online ordering and customer-facing storefronts.
- Registering local clients for delivering a full shop website — menu display, online orders and payments, contact integration, and mobile-responsive layout, reducing their customer inquiry turnaround by eliminating phone-only ordering.

PROJECTS

ZORO Delivery App | React Native · Supabase · MapmyIndia · RazorpayX github.com/areebmohd/DeliveryPlatform

- Customer/Store App: Browse 7+ onboarded stores and 160+ products, add to cart, apply offers and order from local shops. Merchants manage product listings, stock levels and view incoming orders.
- Rider App: Accept/reject delivery requests, perform returns with exchanges, navigate pickup and drop-off using MapmyIndia turn-by-turn routing, update delivery status in real time.
- Admin Panel: Oversee all stores, riders, and orders; approve merchant onboarding; monitor platform-wide analytics across all the apps and control payments and notifications.
- Backend on Supabase and Node.js with Firebase (FCM) powering real-time order updates and push notifications across all 3 apps.

BizManager | React Native CLI · Firebase · UPI · Barcode Scanner github.com/areebmohd/BizManager

- Cross-platform mobile app for Android & iOS — shipped 3 production releases (v1.0.1 to v1.0.3) with 57+ commits and an active APK distributed to users.
- Built inventory management with barcode scanner for fast item lookup across 100+ product entries, UPI QR code generation, WhatsApp bill sharing and Dashboard aggregates daily/monthly sales data with performance charts.
- Integrated Firebase Auth and Firestore for real-time sync of sales, inventory, and dashboard metrics across sessions.

FoodDel | MERN Stack · Razorpay · AdminPanel food-del-frontend-irvg.onrender.com

- Full-stack food delivery platform with end-to-end order flow — menu browsing, cart, Razorpay checkout, and real-time order status updates.
- Admin panel supports management of 3 entities (food items, orders, users) with live order tracking and status controls.
- Deployed on Render with separate frontend and backend services; REST API serves 10+ endpoints covering auth, orders, and payments.

SKILLS

Frontend: React.js, React Native (CLI & Expo), HTML/CSS, Tailwind CSS

Backend: Node.js, Express.js, MongoDB, REST API, Firebase, Supabase

Languages: JavaScript, Python, TypeScript

Tools: VS Code, Github, Canva

EDUCATION

B.Tech in Computer Science Engineering 2023–2027 — CGPA: 8.34

Gurugram University, Gurugram

Class XII (SeniorSecondary) 2022 — 92% | Class X (Secondary) 2020 — 96%

Riverdale International School, Bazpur, Uttarakhand — CBSE Board
